WELCOME MESSAGE

I invite you to apply for the Second Asia Maudsley Forum., a course which offers psychiatrists and psychologists a friendly environment in which to learn about advances in psychiatric research.

We have run similar courses for a decade at the Institute of Psychiatry in London, and also more recently in Italy and Lisbon. We were delighted to collaborate with our close colleagues in Hong Kong to bring this well established learning Forum to Asia for the first time in 2009. The first Forum in 2009 was attended by 88 participants from different parts of the world. It was a resounding success and we received many positive comments from participants.

We have expanded our admission number to 100 this time. We hope that the second Forum will continue to serve as a platform for colleagues to refresh and to learn new skills, as well as to build up new connections for future collaborations across Asia and the world. The programme will comprise a series of informal seminars focused on current research in a number of fields in psychiatry and clinical psychology.

I look forward to seeing you all at the Forum in September!

Sir Robin M. Murray
Professor of Psychiatric Research
Institute of Psychiatry and Maudsley Hospital, London

INFORMATION ON THE COURSE

The Second Asia Maudsley Forum offers exciting opportunity for psychiatrists to learn about the most recent advances in psychiatry. During the course, a range of experts will discuss the most recent developments in clinical and academic psychiatry. The course is designed for psychiatrists and psychologists with an interest in new developments and psychiatric research.

It is an intensive course. Lectures are delivered by leading clinical scientists. Small-group workshops with researchers and clinicians will allow participants to discuss academic issues of interest.

The venue will be Hong Kong Academy of Medicine Jockey Club Building, 99 Wong Chuk Hang Road, Aberdeen, Hong Kong (picture below).
